

A

Cole-Anticevic atlas (Glasser)

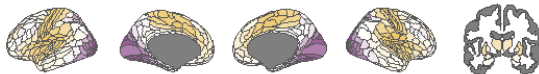

B

Network hierarchy

Gradient 1: Somatosensory vs. Frontoparietal

Gradient 2: Auditory/Motion vs. Vision

Gradient 3: Default mode vs. Frontoparietal

D

Social cognitive measures

- **Reading the Mind in the Eyes Test (RMET)**
Mental state inference from static eye region of faces
- **Penn Emotion Recognition Test (ER40)**
Basic emotion recognition from static faces
- **The Awareness of Social Inference Test-Revised (TASIT)**
 - **TASIT 1: Emotion Evaluation Task**
Basic emotion recognition from videos
 - **TASIT 2: Social Inference (Minimal)**
Sincere, simple sarcastic, and paradoxical sarcastic exchanges
 - **TASIT 3: Social Inference (Enriched)**
Lies and sarcastic exchanges, with enriched contextual cues

Non-social (neuropsychological) cognitive measures

- **MATRICS Consensus Cognitive Battery (MCCB)**
Domain scores:
 - Processing speed
 - Attention/Vigilance
 - Working Memory
 - Verbal Learning
 - Visual Learning
 - Reasoning and Problem Solving

C
